Project

Website Appcation

TronmaticComputer E-Commerce Platform

Present

Student developer with experience building full-stack web applications using Laravel, React + Vite, PostgreSQL, Render and AI engineer. Independently developed and deployed "Tronmatix Computer," a computer hardware e-commerce platform for my final-year thesis, featuring role-based authentication, Google OAuth, order management, localization (Khmer/English), and admin dashboard systems. Interested in gaining real-world experience through a software development internship.

Skill

- PHP Laravel (basic code , MVC, & connect database)
- UX/UI (Figma, Prototype, & desgin website)
- React + Vite (design frontend & config OAuth)
- PS/AE (Editing, Poster Design & effect motion)
- Word/Powerpoint (typing, & design slide)

About Me

- Strong professional foundation with a keen interest in research and problem-solving.
- Able to work independently, adapt quickly to new environments, and learn new skills efficiently.
- Performs well under pressure with a mature, open-minded, and studious attitude.
- A cooperative team player with experience managing projects independently, including planning, design, and report writing.
